

Updates of RENATER 6 network and REFIMEVE monitoring tools

REFIMEVE 2020 General Assembly

Outlines

- RENATER-6 DWDM network
 - Evolutions since 2018 and work in progress
- Ongoing REFIMEVE+ link implementation
- Monitoring REFIMEVE equipment
 - NOC monitoring
 - Internal procedures
- Interactions with NOC RENATER

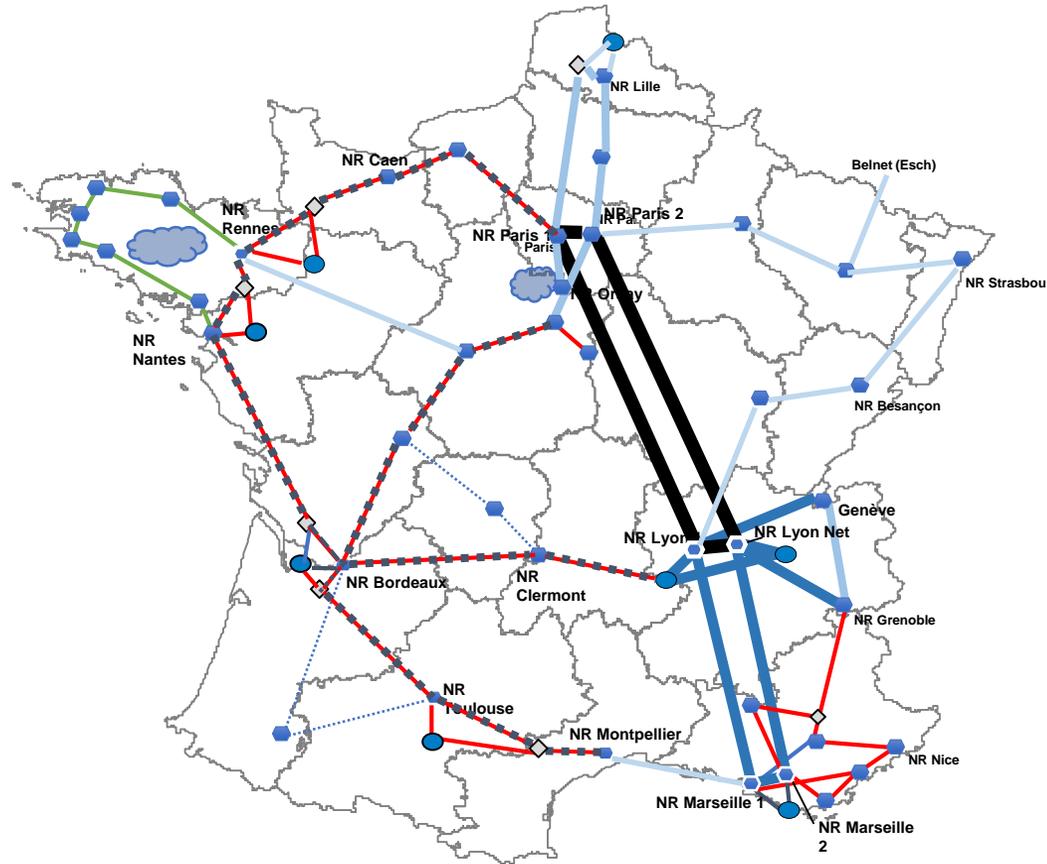

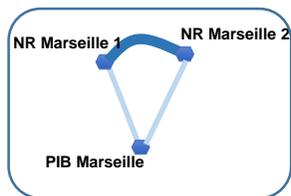

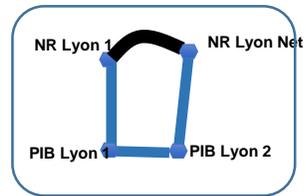

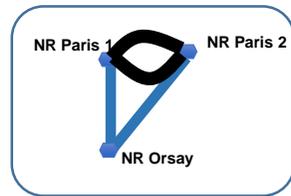

RENATER-6 DWDM network

Evolutions since 2018 (1/5)

- Infinera closes acquisition of Coriant end of 2018
 - One of the largest fully vertically integrated optical network equipment providers in the world Infinera Corporation (NASDAQ:INFN)
 - Ex-Coriant portfolio still upgraded
 - ODUc2 deployed between Paris 1 ↔ Lyon 1 (16QAM)
- Routing
 - Cisco ASR9000
- Network strategies
 - Connectivity between each site will be increased up to 2x100Gbps (improved resilience)
 - Internet traffic between sites aims for 60 Gbps

RENATER-6 DWDM network

Evolutions since 2018 (2/5)

DWDM/OTN optical coherent network

- 1 x 100G Infinera mTera/Hit7300
- 2 x 100G Infinera mTera/Hit7300
- 3 x 100G Infinera mTera/Hit7300
- 4 or more 100G Infinera mTera/Hit7300

Alien wavelengths

- 100G Infinera AW on Ciena layer

Access Network

- G.8032 Infinera (Ring architecture)

RENATER 5 DCM/DWDM transmission network

- Alcatel Lucent 1830 PSS : 2 x 10G
- Ciena CN4200 : n x 10G

Other

- Bandwidth

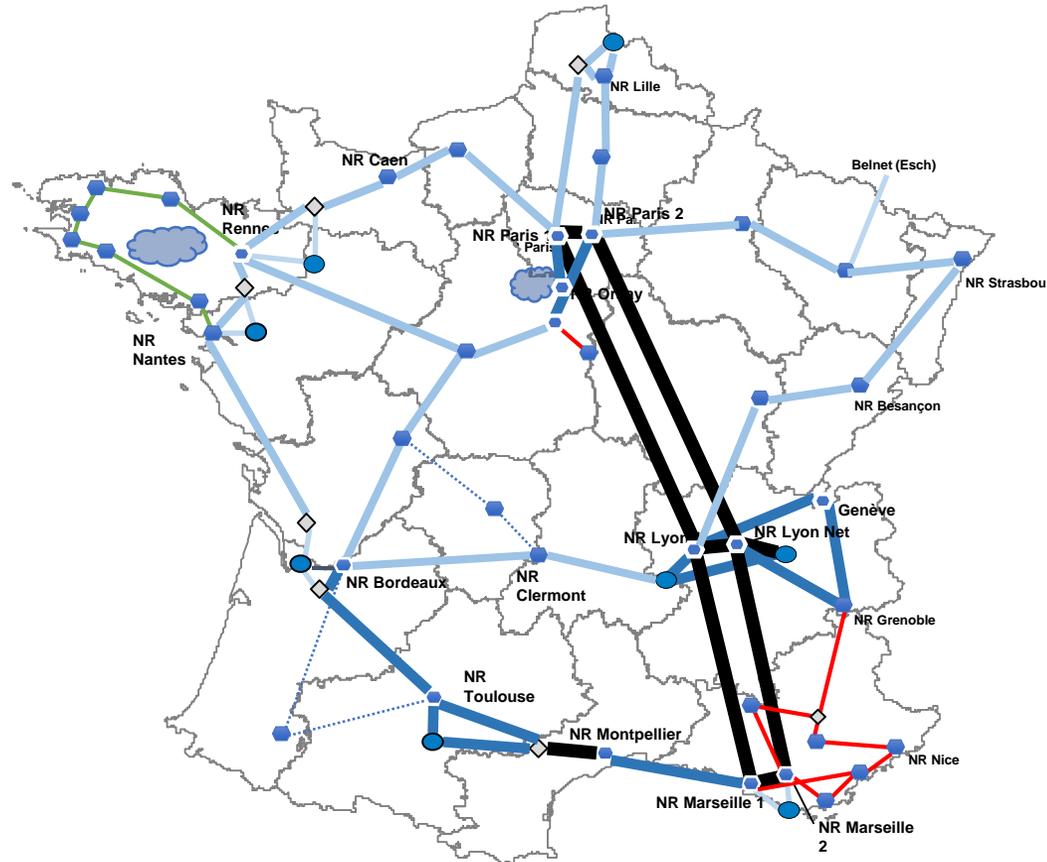

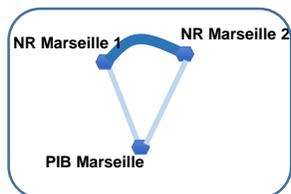

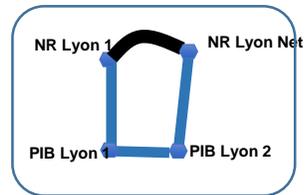

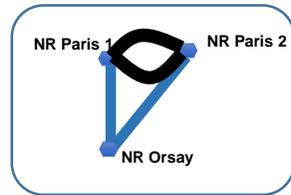

Point of Presence RENATER

- NR
- PIB

RENATER-6 DWDM network

Evolutions since 2018 (3/5)

By end of 2021

DWDM/OTN optical network

- 1 x 100G Infinera mTera/Hit7300
- 2 x 100G Infinera mTera/Hit7300
- 3 x 100G Infinera mTera/Hit7300
- 4 or more 100G Infinera mTera/Hit7300

Alien wavelengths

- 100G Infinera AW on Ciena layer

Access Network

- G.8032 Infinera (Ring architecture)

RENATER 5 DCM/DWDM transmission network

- Alcatel Lucent 1830 PSS : 2 x 10G
- Ciena CN4200 : n x 10G

Other

- Bandwidth

Point of Presence RENATER

- NR
- PIB

RENATER-6 DWDM network

Evolutions since 2018 (4/5)

- **Fibres**
 - Step 1 (12 000/ 15 000km till 2030)
Migrations of Nancy ↔ Strasbourg + Marseille ↔ Montpellier
New fibres path Tours – Rennes + Tours – Orléans + Tours – Poitiers
 - Step 2 (3 000 km in 2020 till 2030)
Renew rest of the backbone
- **Sites**
 - PoP in Strasbourg, moved to new DC (same campus)
 - PoP in Nantes, is moving to new DC (same campus)
 - Geneva racks moved in an other room
 - Netcenter (new site)
 - Tours (new site)

RENATER-6 DWDM network

Evolutions since 2018 (5/5)

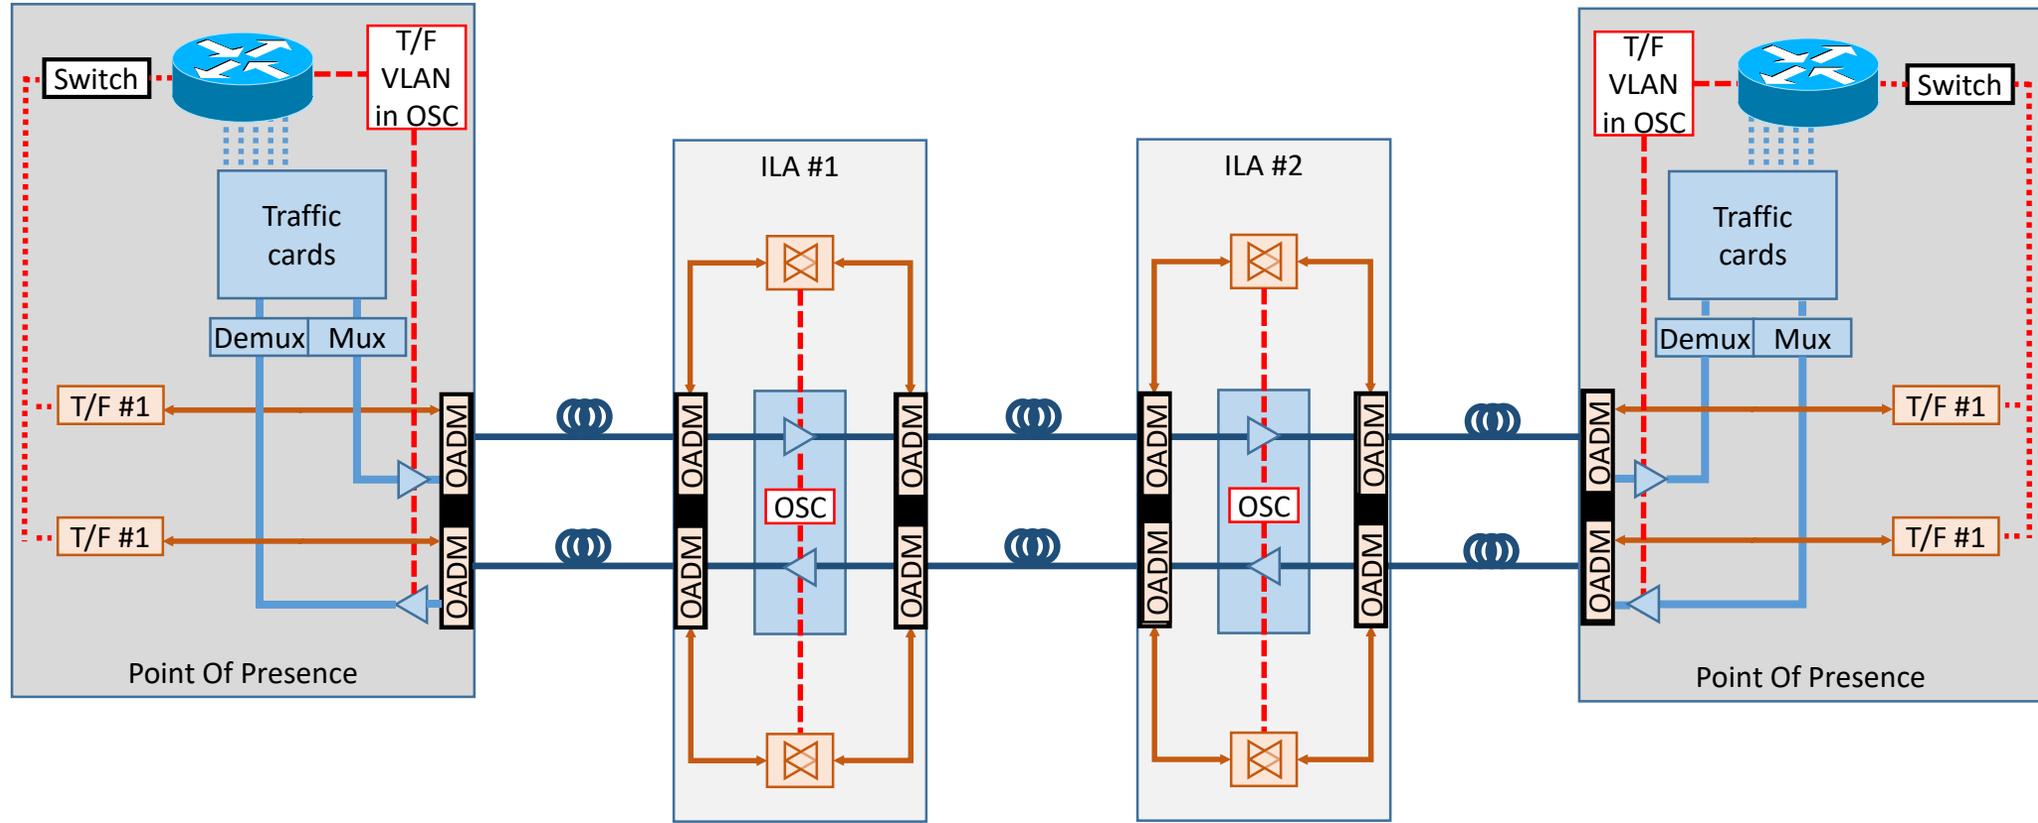

- New NSOC IMS/Thales => BT (now Computacenter)
 - Public procurement (5 years)
 - Impacts all RENATER services
 - BT had been RENATER NSOC previously (till 2015)
 - was in charge of RENATER 6 DWDM Proof of Concept
- New NOC officially since 01/10/2020

Ongoing REFIMEVE+ link implementations

- Lyon 2 to Lyon Netcenter migration
- Remaining REFIMEVE links
 - Grenoble - Lyon Netcenter
 - Montpellier - Marseille 1 - Marseille 2 - Lyon 2
 - Montpellier - Toulouse - Bordeaux
 - Bordeaux - Poitiers - Tours - Orléans – Orsay
 - PACA

Ongoing REFIMEVE+ link implementations

↔ T/F signal

T/F #1 T/F RLS

⊠ Bidirectional amplifier for T/F signal

--- In-Band T/F monitoring added in OSC

⋯ Out-Of-Band T/F monitoring

□ Data traffic equipment

Router

⋯ Client side data traffic (10Gbps, 100Gbps...)

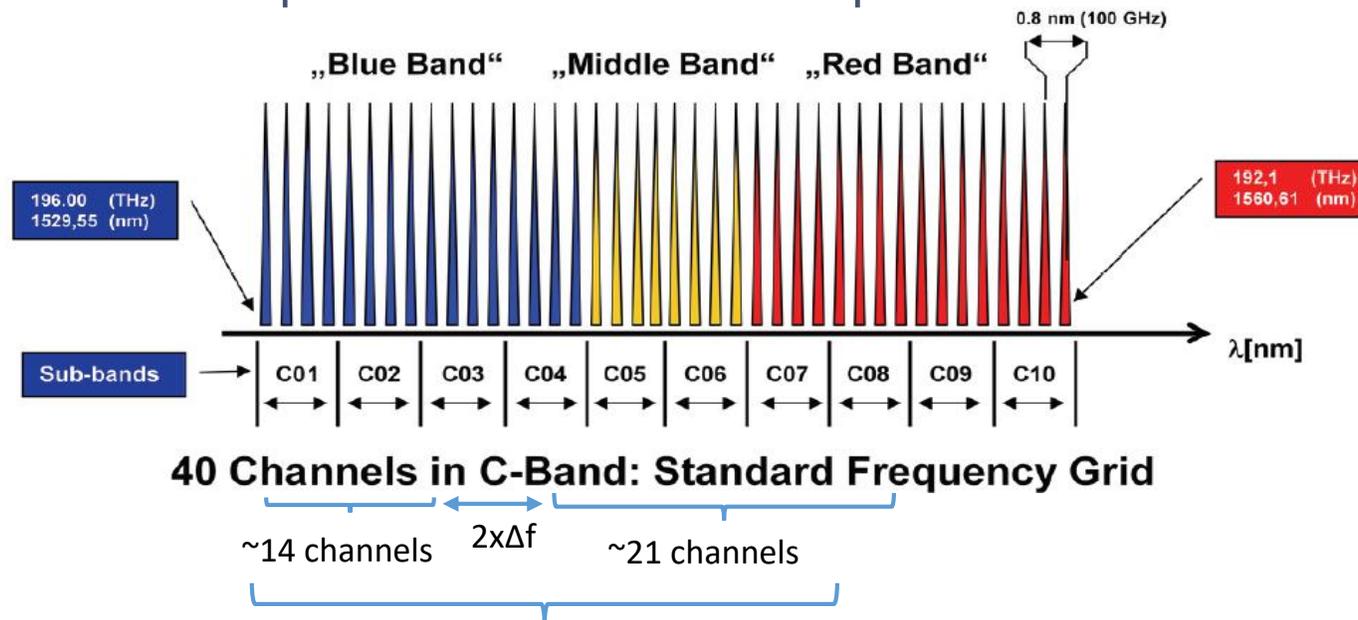

— Line side data traffic (10Gbps, 100Gbps...)

— OMS (Optical Multiplexed Section)

⊠ Pair of fixed Optical Add-Drop Multiplexer (44th channel)

Ongoing REFIMEVE+ link implementations

- Spectrum upgradeable up to 40 wavelengths @ 100 GHz central frequency spacing,
- Each wavelength running @ QPSK or 16-QAM modulation scheme (more in the future)
- So far, no worries on the spectrum utilization in respect to the transmission capacity !

~35 channels <> between 3,5Tbps (@QPSK) and 7,0 Tbps (@16-QAM) of traffic capacity

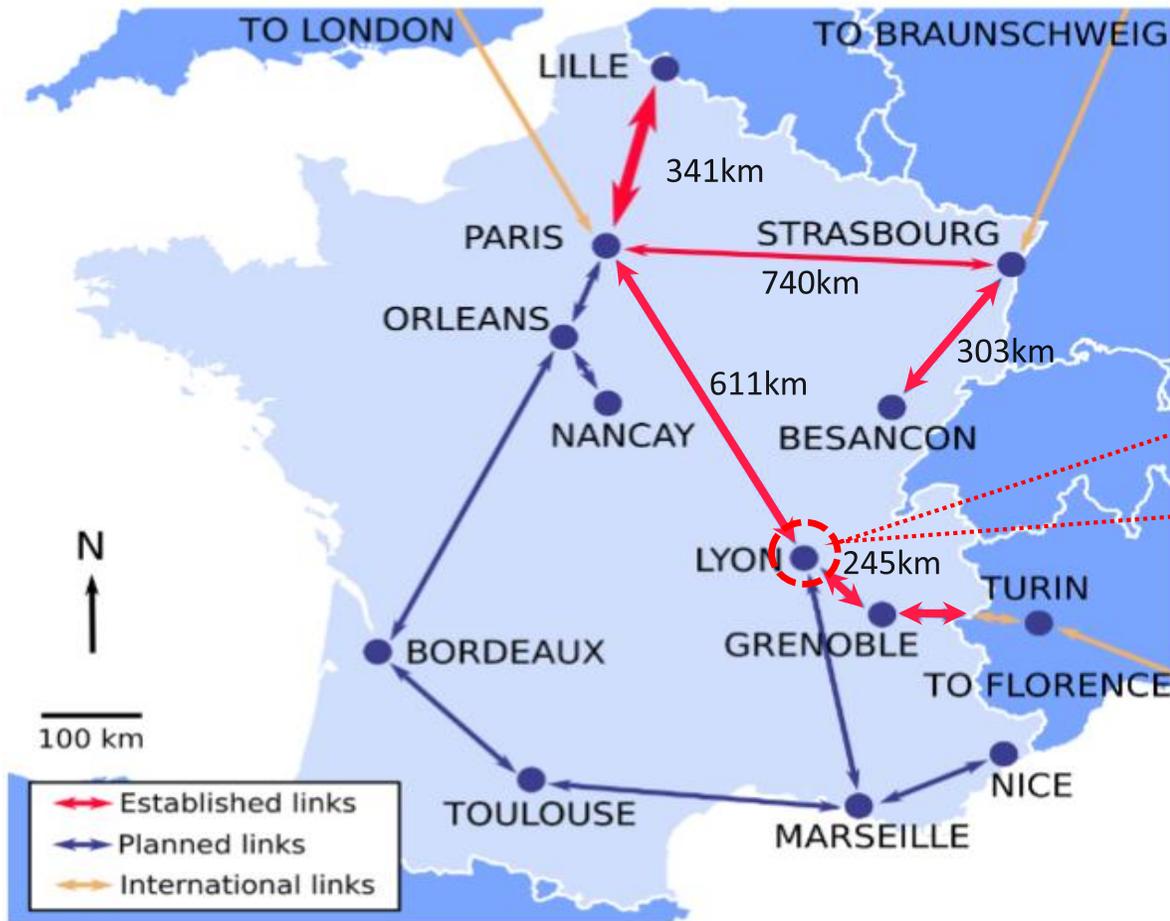

Option : To double the capacity by using 50 GHz spacing grid and more with gridless system

Ongoing REFIMEVE+ link implementations

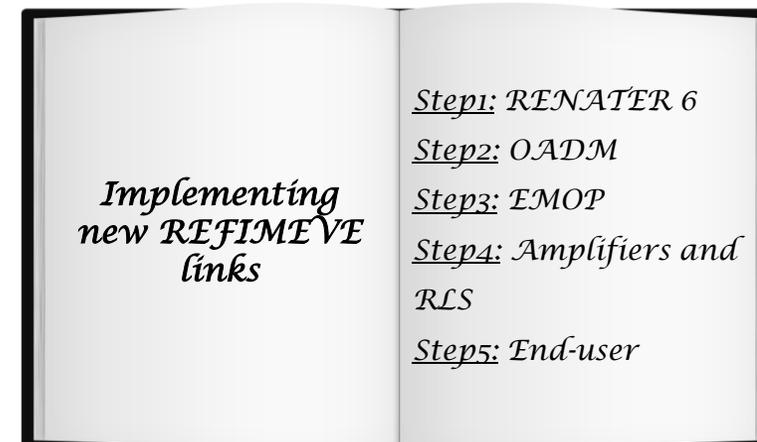

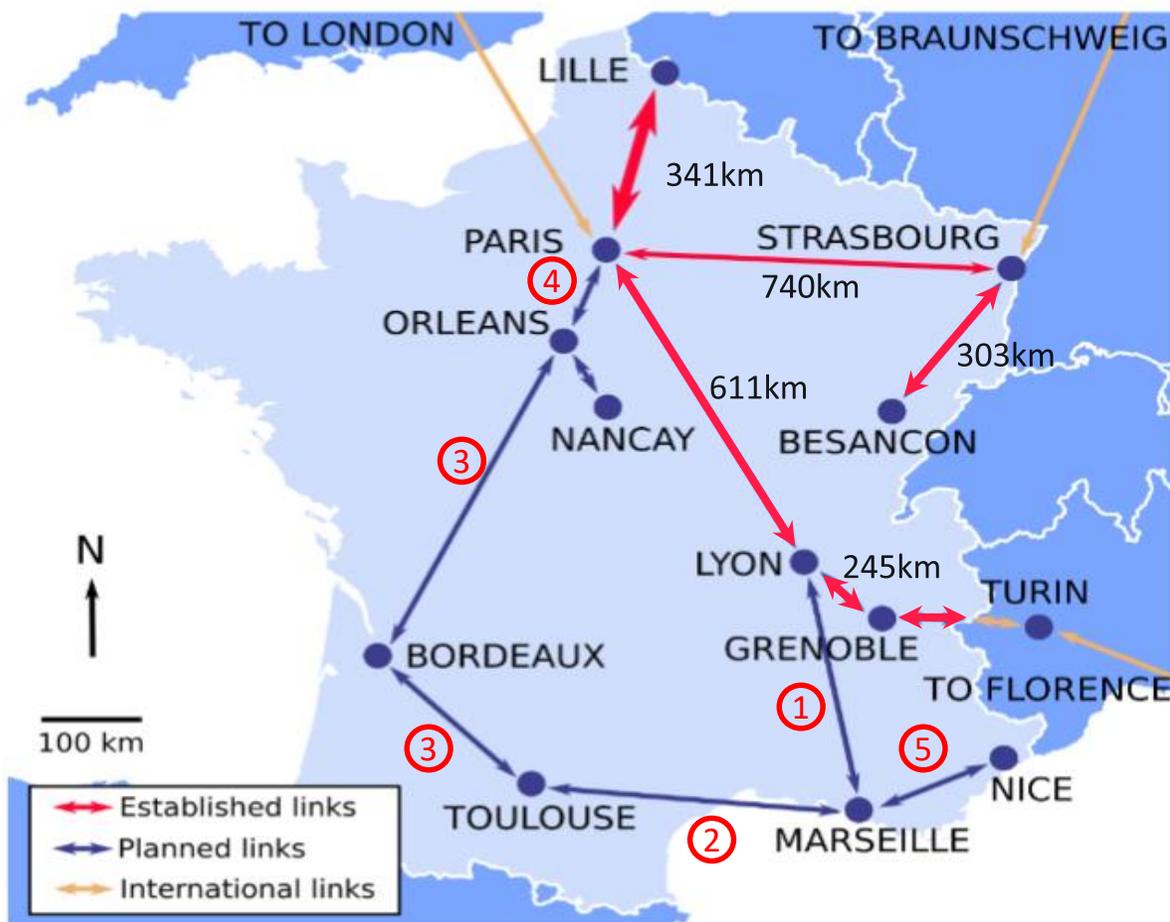

Since 2008:

- **12 years** of cohabitation between data traffic and T/F services
- **3 years without guard band** (42nd and 43rd channels used for data traffic)
- 1 incident in 2015 when first Coriant Raman cards were deployed
 - => Impact on the neighbouring channel lasted 72 hours
- **Never impacted** end-users

Ongoing REFIMEVE+ link implementation

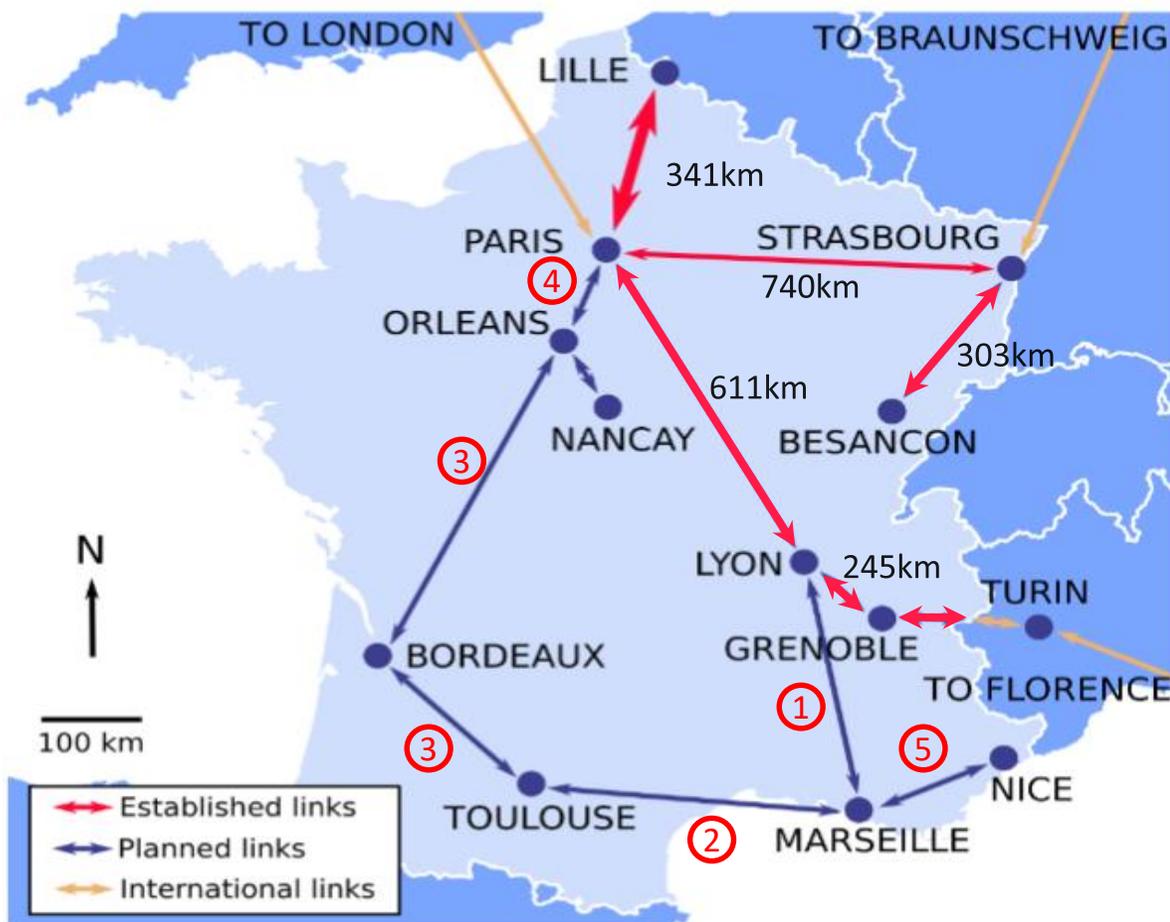

Ongoing REFIMEVE+ link implementation

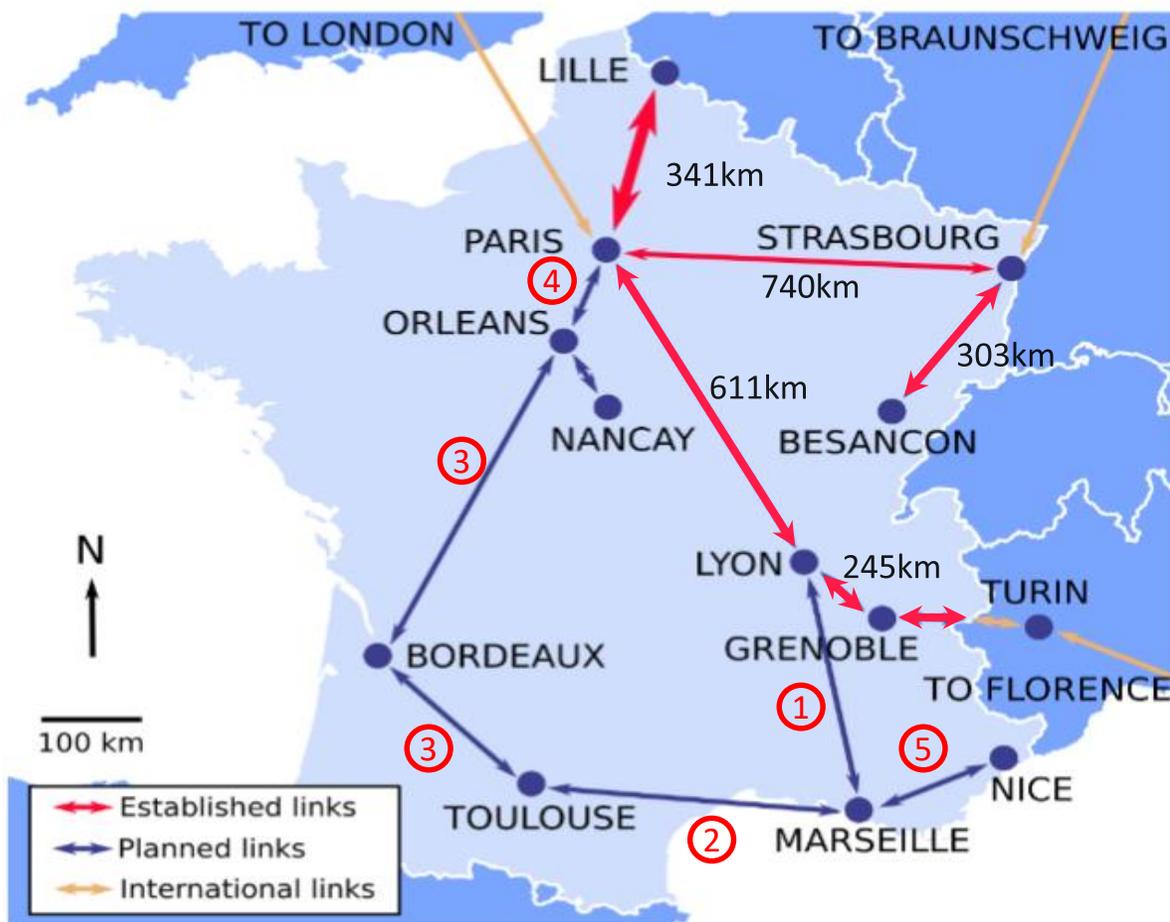

Implementation area 1	
Current status	RENATER 6 ✓ OADM ✓ REFIMEVE EMOP ✗
Planning	Post Lyon Netcenter migration

Ongoing REFIMEVE+ link deployments

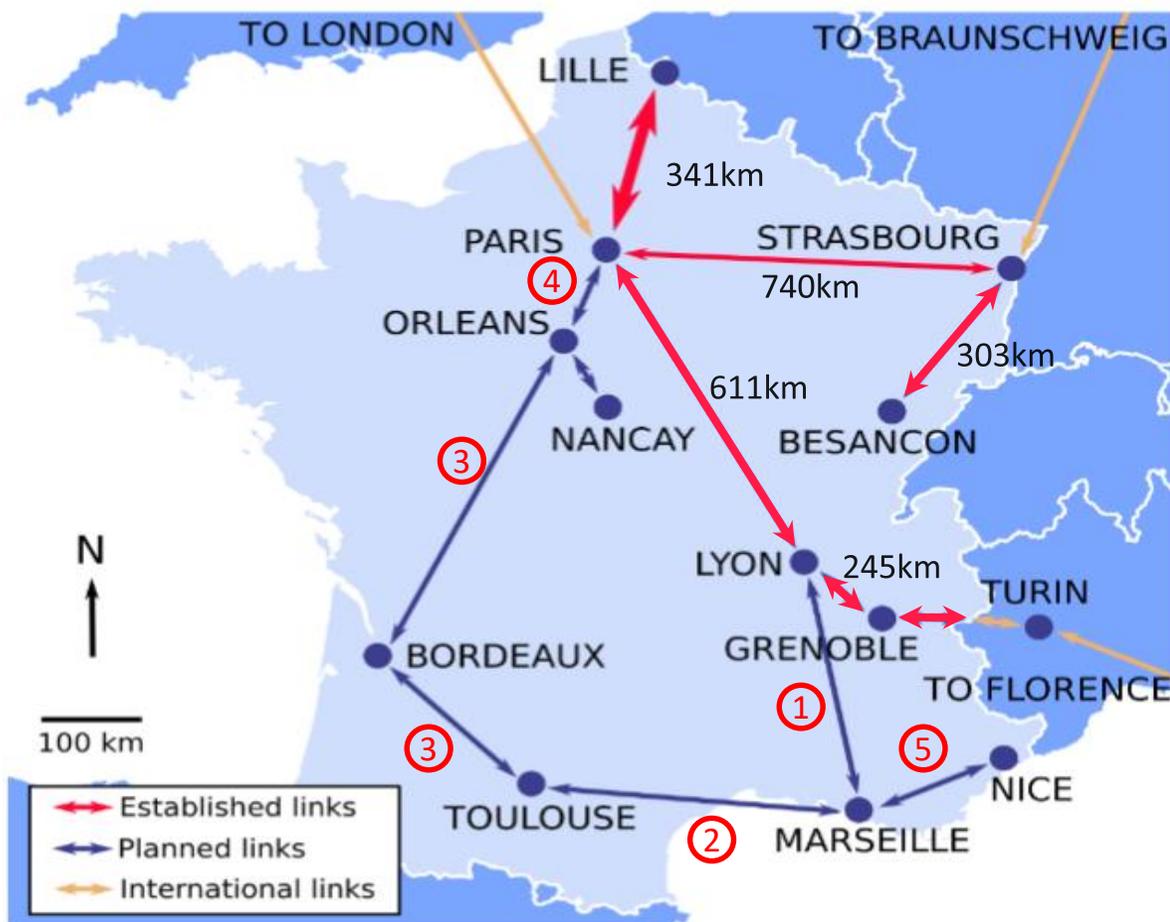

Implementation area 2	
Current status	RENATER 6 ✓ OADM ✓ REFIMEVE EMOP ✗
Planning	Post Lyon Netcenter migration Signal has to arrive to Marseille first

Ongoing REFIMEVE+ link deployments

Implementation area 3	
Current status	RENATER 6 ✗ OADM ✗ REFIMEVE EMOP ✗
Planning	Post Lyon Netcenter migration RENATER 6 and OADM first quarter 2021

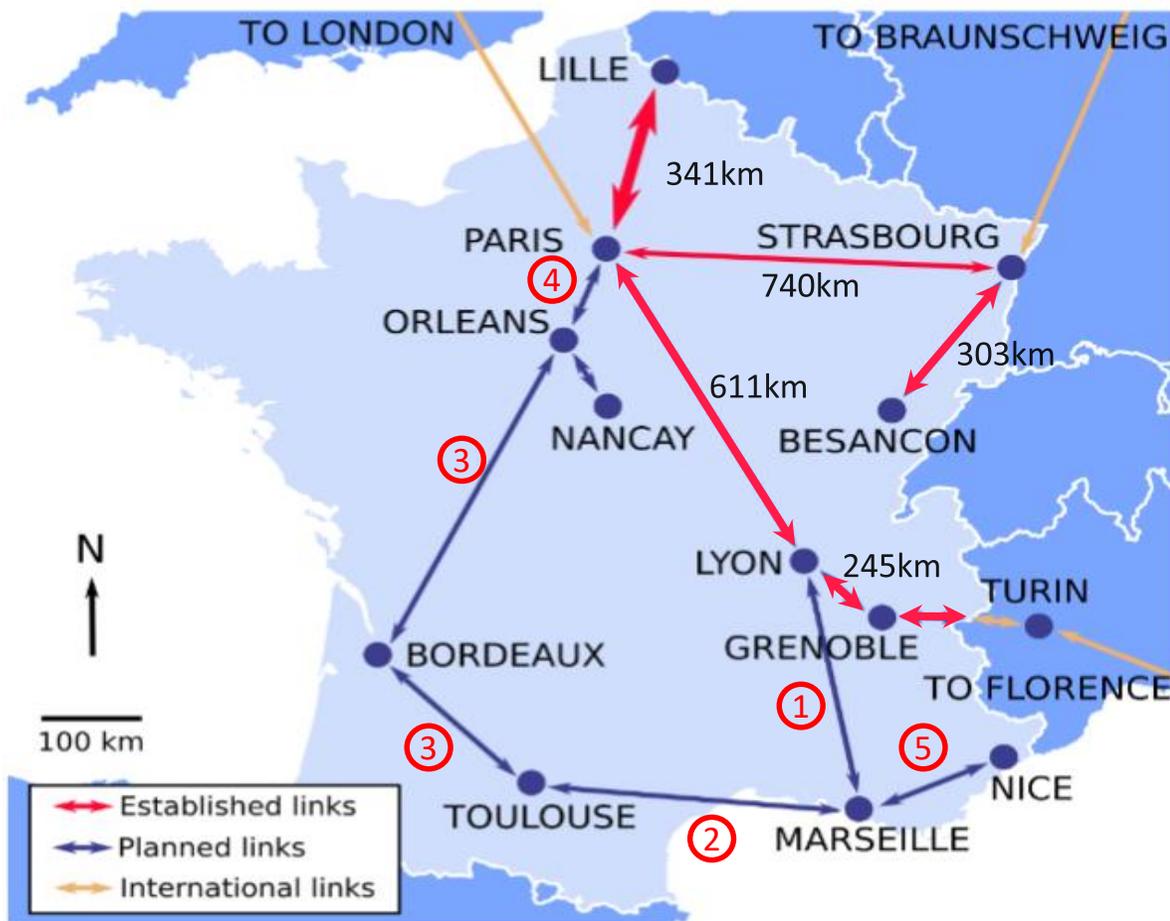

Ongoing REFIMEVE+ link deployments

Implementation area 4

Current status	RENATER 6 ✓ OADM ✗ REFIMEVE EMOP ✗
Planning	Post Lyon Netcenter migration Fibre provider has deploy new fibres Dedicated rack in Orsay for REFIMEVE equipment

Ongoing REFIMEVE+ link deployments

Implementation area 5	
Current status	RENATER 6 ✗ OADM ✗ REFIMEVE EMOP ✗
Planning	OADM will be implemented in RENATER 5 network

Interactions with NOC RENATER

- Mailing lists
 - run_refimeve@groupe.renater.fr
Core REFIMEVE Team + Muquans
 - In case equipment failure
 - Incident or maintenance occurring in a T/F link
 - refimeve@noc.renater.fr
Members of REFIMEVE consortium (draft version with list of people attending REFIMEVE AG 2018)
 - Incident or maintenance occurring in a T/F link
- Feel free to report to nicolas.quintin@renater.fr any undesirable communication

Conclusion

- 2019 and 2020 faced very slow implementation processes
- Ongoing work to provide a simple way to overview the status of REFIMEVE network and monitor REFIMEVE equipment
- Remaining REFIMEVE links
 - Grenoble - Lyon Netcenter early 2021
 - Montpellier - Marseille 1 - Marseille 2 - Lyon 2 early 2021
 - Montpellier - Toulouse - Bordeaux 2021
 - Bordeaux - Poitiers - Tours - Orléans – Orsay 2021
 - PACA 2021

Thanks for your attention
